Scenario \# 2

1. All three middle schools will have to have three different athletic periods in order for our staff to be there for collaboration
2. Rotations at these campuses would be necessary for the staff to be at the three different campuses using CC, HC and FA
3. High schools will need four additional staff members at each campus
4. Cost $\qquad$
***CC = Campus Coordinator
***HC = Head Coach
***FA $=$ First Assistant
***JV = Junior Varsity
***OC=Offensive Coordinator
***DC=Defensive Coordinator

[^0]:    1. Master schedule for each middle would need to be the same for athletics
    2. Would need additional 6 sections as result of support from FA ( 3 at amchs) and ( 3 at cshs-volleyball and basketball). Rotate FA and HC for support on $50-$

    50 3. Two sections for FB
    4. Each of the sports supporting the MS would be flipped in regards to HC, FA, OC and DC...coaches would be going at the same time on this split for collaboration
    5. Currently work this scenario in football. The exception on this scenario would have both MS on the same athletic period for volleyball and girls basketball 6. Will need 4 sections each from Consol and CSHS....basically one staff member for each high school
    7. Cost
